

Dear B.A.S.S. Nation President,

While Rigid Industries started as an off-road lighting company, we currently produce lighting for off-road, powersports, agriculture, mining, construction, police and fire rescue industries, and of course, marine. We take pride in the fact that our LED lighting products are designed, engineered, and assembled in the U.S.A. Not only does this help build our local economy but it also allows us to be hands-on to ensure the highest level of quality that you've come to expect from Rigid Industries LED Lighting.

Rigid Industries believes in the B.A.S.S. Nation's conservation initiatives, youth programs, and the road they have built for the weekend warrior to get a chance at living the dream. To thank you, we would like to offer all of your B.A.S.S. Nation club members a discount on our LED lighting and all accessories.

To join the Rigid Nation, Please contact Chris Brown below.
